**Subject:** Firefox Nightly 49 - Elevated Update Conditional Sign Off

Hi,

Please see below the current status for the Elevated Update feature:

**Feature Category:** Medium

**Testing Status:** COMPLETED

All the available tests were executed, on Nightly 49.0a1, across the following platforms: OSX 10.9, OSX 10.10, OSX 10.11. Additional exploratory/smoke tests were performed on Nightly 49.0a1 on Windows 7.1 x32, Windows 8.1 x32, Windows 10 x64.

**1. Overall build status after testing:** YELLOW

The following issues were found during the testing sessions as follows:

- new issues:
  - **1 critical** issue
  - *3 low impact* issues
- reopened issues
  - **1 major** issue
  - *1 low impact* issues

**2. Recommendation from QE:** CONDITIONAL SIGN-OFF

Based on the testing results we are signing off the "Elevated Update" feature to Aurora Channel. The sign-off status is set to yellow

level - conditional sign-off due to the following issues: [Bug 1274319](#) , [Bug 1273536](#) , [Bug 1278248](#)

### 3. Manual Testing Summary:

- Focus area:
  - Normal Update
  - Verify Elevated Update
  - Windows service stability after the MAC related code changes
- Test Plan: [Elevated\\_update Test Plan](#)
- Detailed Test Results: [Test Run Results](#)

### 4. Reported bugs for this build:

- Full list with the logged bugs can be found at: [Logged Bugs](#)

### 5. Known Issues for this build:

- **High impact issues:**
  - [Bug 1274319](#) - [Elevated Update] Fast Elevation Cancel hangs Firefox
  - [Bug 1278248](#) - [Elevated Update] Software Update new Downloading window
- **Low impact issues:**
  - [Bug 1273545](#) - [Elevated Update] Loading Panel is displayed too early in the Elevate Update process
  - [Bug 1273536](#) - [Elevated Update] If FF is not the default browser and the "default browser check" window sends the updater window behind the browser
  - [Bug 1278248](#) - [Elevated Update] Software Update new Downloading window

Regards,  
Adrian Florinescu
