Subject:	Nighty 45 build - Search Refactor SignOFF

Hi Ryan/Florian,

Please see below the current status for Search Refactor Feature:

Testing Status: <mark>GREEN/ DONE</mark>
We've executed 100% of the tests on the latest build with the last fix committed, build from 12.11.2015.

1. Overall build status after testing: <mark>GREEN</mark>.
No blockers or major issues found so far.

2. Recommendation from QE: We can open the update Aurora track
Current test results point to a pretty solid Search Feature, with several known bugs - none of them blockers/crashers. That being said, **the build looks good for the merge to Aurora track.**

3. Manual Testing summary:

- **Full Testing**: https://docs.google.com/spreadsheets/d/1xd31SYxmMfr5s-7C0AVS0v4oGDrxvripqgyIAK6Qae0/edit#gid=707010744
- **Test Plan**: https://wiki.mozilla.org/QA/Search_refactoring

5. Known bugs for this build:

- **Major issues**: none
- **Low impact issues:** https://wiki.mozilla.org/QA/Search_refactoring#Bugs_Work

Regards,
