# Add-on Localization

Jorge Villalobos

<http://mzl.la/sin-locale>

# Non-SDK Add-ons

- chrome.manifest points to locale dirs.
- .dtd for XUL files and .properties for everything else.

# Babelzilla

- <http://babelzilla.org>
- Add-on translation community.

# Manual locale creation

- Extract.
- Edit.
- Rebuild.
- Standalone locale packages.
- Hello World example.

# SDK Add-ons

- Localization tutorial.
- Uses .properties files that are transformed into JSON files.
- Still experimental.
- Add-on Builder doesn't support it yet.

# Thank you!
