B.Y.O.B. allows you to add a custom skin, called Personas for Firefox. Personas are a great way to brand your browser with a unique look. To make sure that your browser is built with Personas built-in, make sure to check the box below.

There are many Personas to choose from, and you can even create your own. To create your own Persona, please visit the Persona's website for step-by-step instructions and tutorials.

If you already have a Persona created, you can specify the Persona you'd like to use below by checking the box below.

DR note: I'm not really 100% sure how this manifests itself in the end product. If you add a collection url, does a user see this as an option when they install the build? If so, this is the copy I'd use:

Add-ons are small pieces of software that add features and functionality to your browser. You can choose a set of Add-ons to suggest. B.Y.O.B. allows you to customize your distribution with a set of Add-ons called a collection.

If you have an Add-on Collection, you can enter it below. If you'd like to create one, please visit the Add-on collections homepage (add link).

You can learn more about Collections and Add-ons here (add links).

Mozilla's Build Your Own Browser (B.Y.O.B.) application creates a customized version of Firefox that can be publicly distributed. These customized versions of Firefox are licensed under the [Mozilla Public License](#) (MPL), and their installation files and contents are subject to the restrictions outlined in the [Mozilla Trademark Policy](#). By using BYOB and/or distributing the installers generated by BYOB, you understand and agree to this policy.

The rules governing this distribution, which are further outlined in the Mozilla Public License and the Mozilla Trademark Policy are:

- The program installers generated by BYOB and/or their contents may not be modified in any way
- Any installer distributed must be signed with a digital certificate issued by Mozilla
- The installers must be distributed at no cost to the end-user
- The installers must be distributed as-is as a stand-alone file, and may not be incorporated with a meta-installer or pre-installed
- When referring to the product name, the installer must be referred to as Mozilla Firefox to differentiate it from the default release of Firefox.

If you have any questions or need clarification regarding these conditions, please [contact us](#).

Distribution and generation restrictions

Mozilla's Build Your Own Browser (BYOB) application generates installer files for a lightly customized version of Firefox that can be publicly distributed. These customized versions of Firefox are licensed under the [Mozilla Public License](#) (MPL), and the installer files and their contents are subject to the restrictions outlined in the [Mozilla Trademark Policy](#). By using BYOB and/or distributing the installers generated by BYOB, you understand and agree to this.

There are a few rules regarding distribution of the installers, and breaking any of the rules automatically revokes your (or your organization's) authorization to distribute them. The rules, which are further outlined in the Mozilla Public License and the Mozilla Trademark Policy are:

- The program installers generated by BYOB and/or their contents may not be modified in any way
- Any installer distributed must be signed with a digital certificate issued by Mozilla
