Text Length

1 **Short Message Notifications**
If the text message does not exceed three lines, the entire message should be viewable in the notification window, and the action can be to reply directly.

2 **Long Message Notification**
If the text message exceeds three lines, it should be cut and the reply button should be a View button leading to viewing the full message in the respective application.

Volume and Mute Control Feedback
Alert Notifications

Volume
Hold ⊖ to mute
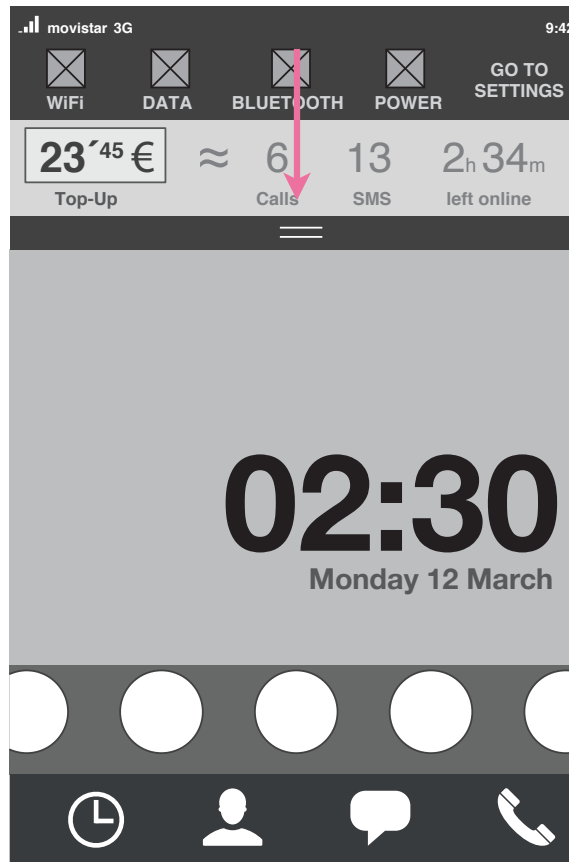

Speaker Muted
Hold ⊕ to unmute

Details

1 Volume Feedback
When the hardware volume buttons are pressed, and the user is not on the lock screen, a notification appears instantly indicating the volume level the user is adjusting to.
It also provides an indication how to mute the phone via hardware volume (if no physical silence switch is present).

2 Unmute Feedback
When the user mutes the phone, this passive notification appears instantly giving visual feedback and an indication of how to unmute the phone.
